Digital Competencies for Industry 4.0

Vietnamese case: issues and challenges

Assoc. Dr. Nguyen Chi Thanh
Faculty of Teacher Education
Vietnam National University

Plan

- Introduction
- Issues
- Challenges
- New teacher education approach
- Competency approach in the new general curriculum
- Student digital competencies

New vision for Education

The New Vision for Education project examines the role that technology can potentially play to improve education for the future. In phase II, we investigated innovative ways to help students develop competencies* and character qualities** broadly defined as social emotional skills, which are critical components of 21st century skill framework but not a core focus in today's curriculum.

SMART Education for Society 5.0

- The revolution is not about introducing more tech into schools. It's about creating access and scalable models to transform Education towards a ubiquitous system .
- Smart Education” Approach should be simplified for teachers, parents and education managers; integrative for community collaborations.
- In the current 4.0 Revolution, Smart Education is constantly happening outside of the School Systems. So how do we maximize opportunities?
 - Lower Costs to Sustain Smart Education
 - Leveraging Resources to Co-Create Qualified Instructions
 - **REMOVE COMPETITIVENESS** and **INSPIRE BENEFICIAL COLLABORATIONS** for sustainable and regenerative development.

Characteristics of the Vietnam new curriculum (from 2020-2021 academic year)

Characteristics of the Vietnam new curriculum (from 2020-2021 academic year)

10 core competencies

Common competencies

- 1) Self autonomous
- 2) Collaboration and communication
- 3) Problem solving and creativities

Specifics competencies

- 1) Language
- 2) Computation
- 3) Understanding on Nature and Society
- 4) Technology
- 5) Informatic
- 6) Esthetic
- 7) Health

Special competencies (for gifted students)

To develop student's competencies and values

Student digital competencies in new curriculum

Questions	Explanation
1. What are the changes in the curriculum objectives?	<p>1. General objectives of the all 3 educational levels</p> <ul style="list-style-type: none"> - Contribute to the formation and development of all five core qualities, three general competences, and seven professional competences, <u>in particular the informatics competence identified in the General Curriculum.</u> - Assists in the formation and development of all students in informatics competence including 5 groups of competency components: <ul style="list-style-type: none"> – Competence <u>a</u>: <i>Use and management of tools, means, automation systems of IT and ICT.</i> – Competence <u>b</u>: <i>Knowledge and behavior in accordance with ethical, cultural and legal standards in the information society and knowledge economy.</i> – Competence <u>c</u>: <i>Detect and solve problems with the support of digital technology.</i> – Competence <u>d</u>: <i>Learning, self-learning with the support of IT and ICT systems.</i> – Competence <u>e</u>: <i>Communication, integration, cooperation in accordance with the era of knowledge economy.</i> <p>Informatic Subject equips students with a common computer knowledge system consisting of three integrated strands:</p> <ul style="list-style-type: none"> - Computer Science (CS) - Information and Communication Technology (ICT) - Digital Literacy (DL)
