

The background of the slide features a blue gradient with a digital grid pattern. In the lower-left foreground, a hand is shown holding a small, glowing blue globe that displays a world map. Behind the hand and globe, there is a faint, stylized city skyline with various skyscrapers. The overall theme is digital technology and global connectivity.

# **Innovating Education in Response to Opportunities and Challenges of Digital Industry: The Case of Open and Distance Learning in West Java Province, Indonesia**

R. Alpha Amirrachman, M.Phil., Ph.D  
SEAMEO Regional Open Learning Centre (SEAMOLEC) Director

**SEAMEO-University of Tsukuba Symposium VII**  
10 February 2019, Tokyo, Japan

# Why Open and Distance Learning?

- Access and reach
- Equity and gender
- Quality and effectiveness
- Relevance and life-long learning
- Globalization and technology
- Cost and efficiency

(Sanjaya Mishra, 2010)

# What is Open Learning?

Giving learners choice about:

- medium or media, whether print, on-line, television, or video;
- place of study, whether at home, in the workplace or campus;
- pace of study, whether closely paced or unstructured;
- support mechanism, whether tutor on demand, audio conferences or computer-assisted learning; and
- entry and exit points

(Sanjaya Mishra, 2010)

# What is Distance Learning?

It refers to the following characteristics:

- separation of teacher and learner
- institutional accreditation
- use of mixed-media courseware
- two-way communication
- possibility of face-to-face meetings
- use of industrialized processes

(Sanjaya Mishra, 2010)

# Teaching-Learning Scenario

|                        | <b>Same time</b>  | <b>Different time</b>   |
|------------------------|---|---|
| <b>Same place</b>      | <b>Classroom teaching, face-to-face tutorials and seminars, workshops and residential schools</b>   | <b>Learning resource centres, which learners visit at their leisure.</b>                    |
| <b>Different place</b> | <b>Audio conferences and video conferences; television with one-way video, two-way audio; radio with listener-response capability; and telephone tutorials.</b> | <b>Home study, computer conferencing, tutorial support by e-mail and fax communication.</b> |

(Sanjaya Mishra, 2010)

# Globalization

Nairn (2009) in his article entitled 'Globalization':

- Around the globe all kind of individuals and groups are connected easily and no single crisis could slow down their activities, not even an economic crisis.
- Globalization is such a diverse, broad-based, and potent force that not even today's massive economic crash will dramatically slow it down or permanently reverse it.

# Industrial Revolution

## INDUSTRIAL REVOLUTION TIMELINE

### First

Water and steam power is used to create mechanical production facilities.

1800

1784: First mechanical

### Second

Electricity lets us create a division of labor and mass production.

1900

1870: First assembly

### Third

IT systems automate production lines further.

2000

1969: First programmable

### Fourth

IoT and cloud technology automate complex tasks.

Today

# Challenges for Southeast Asia

- Inequality access to education in the region
- The transformative impact of this revolution will demand that countries think deeply about their policies and priorities at a national scale
- Southeast Asian countries must together develop education system which is forward-looking, future oriented, pragmatic and strategic

**The future is NOW!**

## Factors to disparities in accessing education in Southeast Asia

1. lack of available school building and classroom with all required facilities
2. shortage of teachers, especially in remote areas
3. uneven spread of population
4. lack of good textbooks and other learning materials
5. geographical location
6. student's and parent's low appreciation toward education
7. level of socio-economic condition of the family
8. lack of budget for building more schools, classrooms, learning facilities

# SEAMOLEC and its ROLES

The Provision of Distance Learning Programme for West Java Province

# Programme Objectives

1. to improve access, quality, and relevance of secondary education
2. to support the achievement target of Universal Secondary Education in Indonesia
3. to improve access to secondary education for the junior high school graduates who are unable to continue their education due to economic, geographical, time, social and cultural constraints
4. to increase the enrolment number of secondary education in West Java Province
5. to improve the quality and access of education through distance education system in Indonesia, especially in West Java province
6. At a wider scope, this programme is expected to reduce unskilled labor and improve their working skills and capabilities

# Number of schools as ODL providers

# Number of schools as ODL providers in 2017

# Number of schools as ODL providers in 2018

# Number of Community Learning Centres

# Number of ODL students in West Java Province

# Number of teachers and tutors involved in ODL

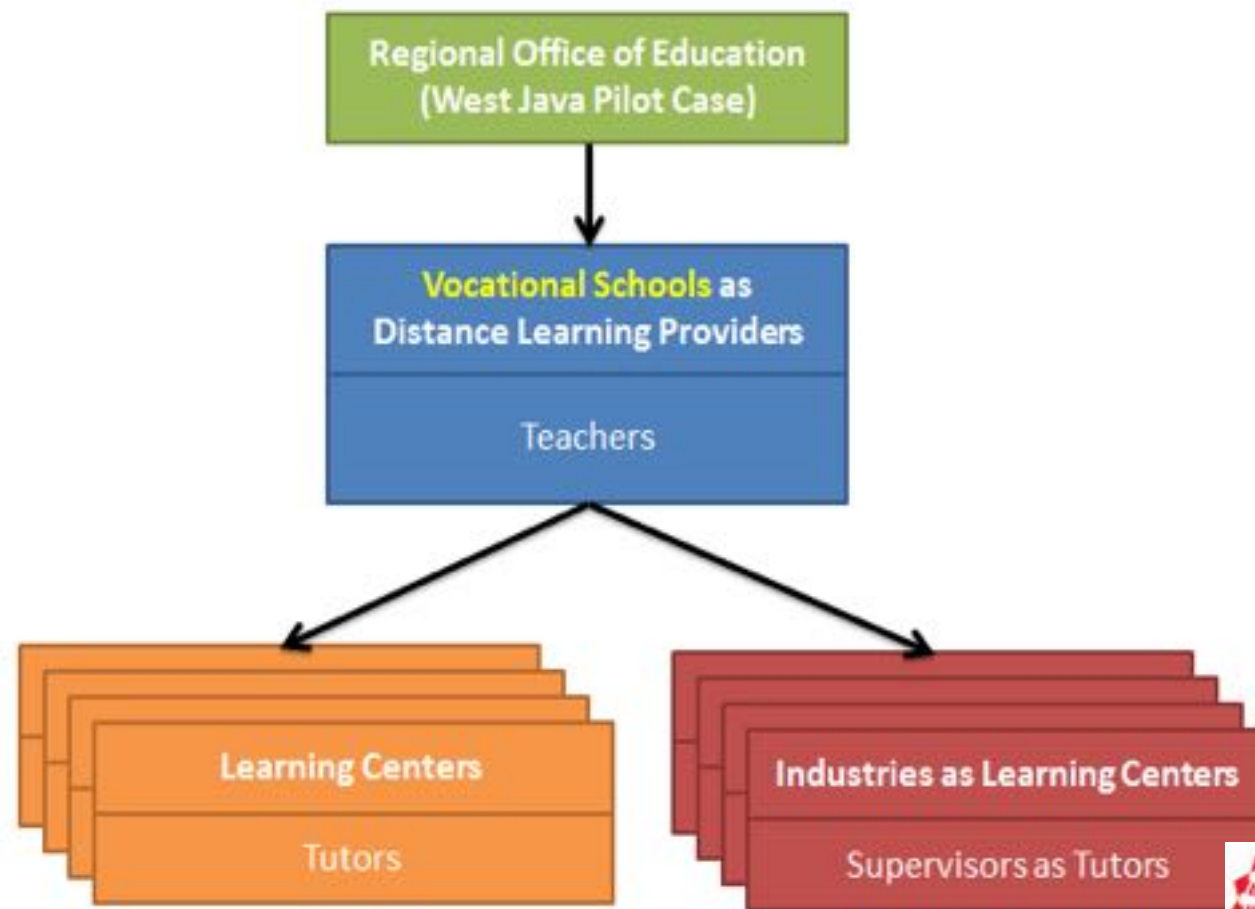

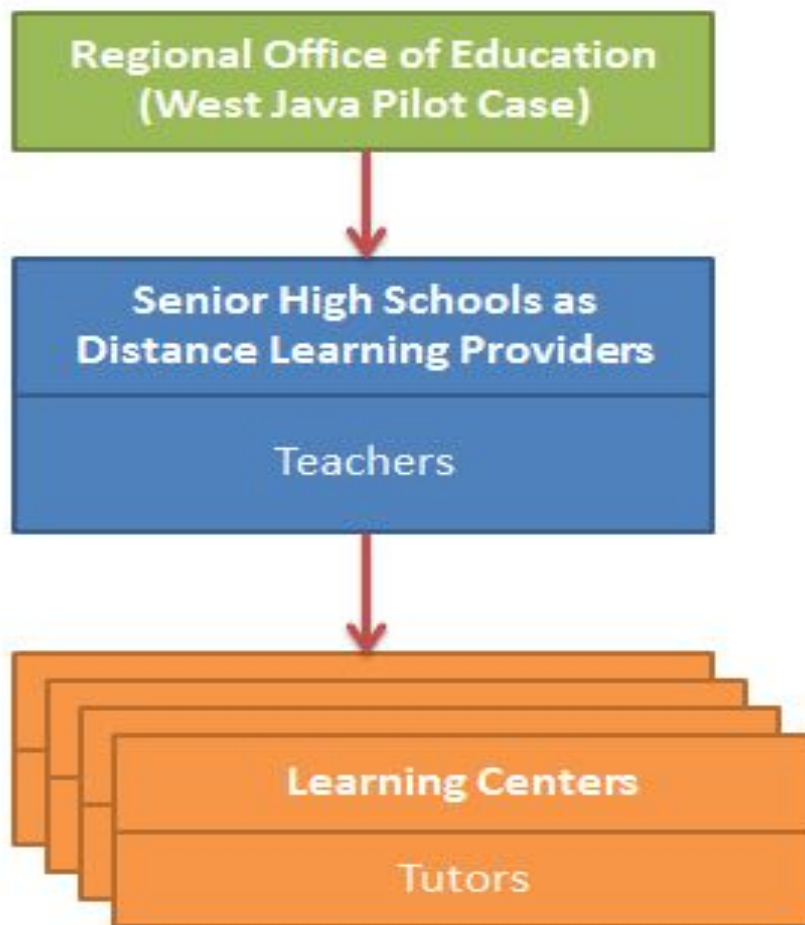

# SEAMOLEC's Roles

SEAMOLEC involved in:

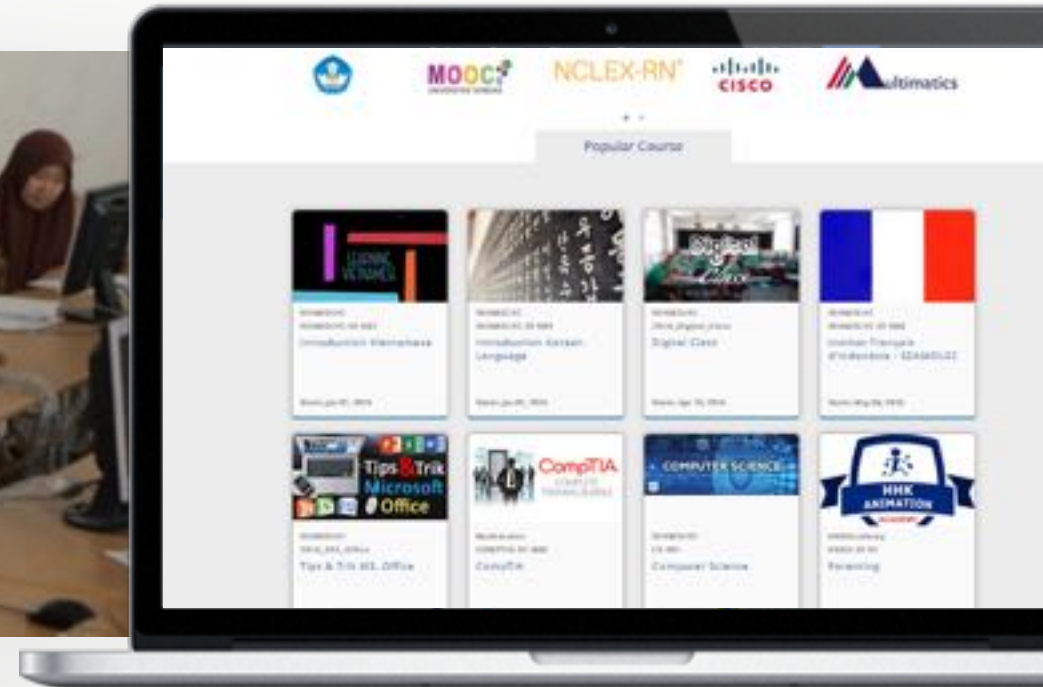

1. developing the programme design
2. creating guidelines
3. curriculum adjustment
4. programme and system development
5. instructional materials development and teacher training

# 2 Types of Distance Learning Implementation

# REQUIREMENT for conventional digital learning

” Internet  
Computer lab  
Satellite  
Server  
Personal Computer

How about  
remote areas?

” This is  
**SIERRA**

**SEAMOLEC Innovation on Educational  
Resources for Remote Area**

# SIERRA Specification :

- ✓ Can be accessed by 30 Students (default)
- ✓ Can distribute more than 60.000 Contents
- ✓ Can be used as local server
- ✓ Use less resource power
- ✓ Replace electricity using *power bank* or *solar cell*
- ✓ Can be used for exam try out with more than 1.000 questions

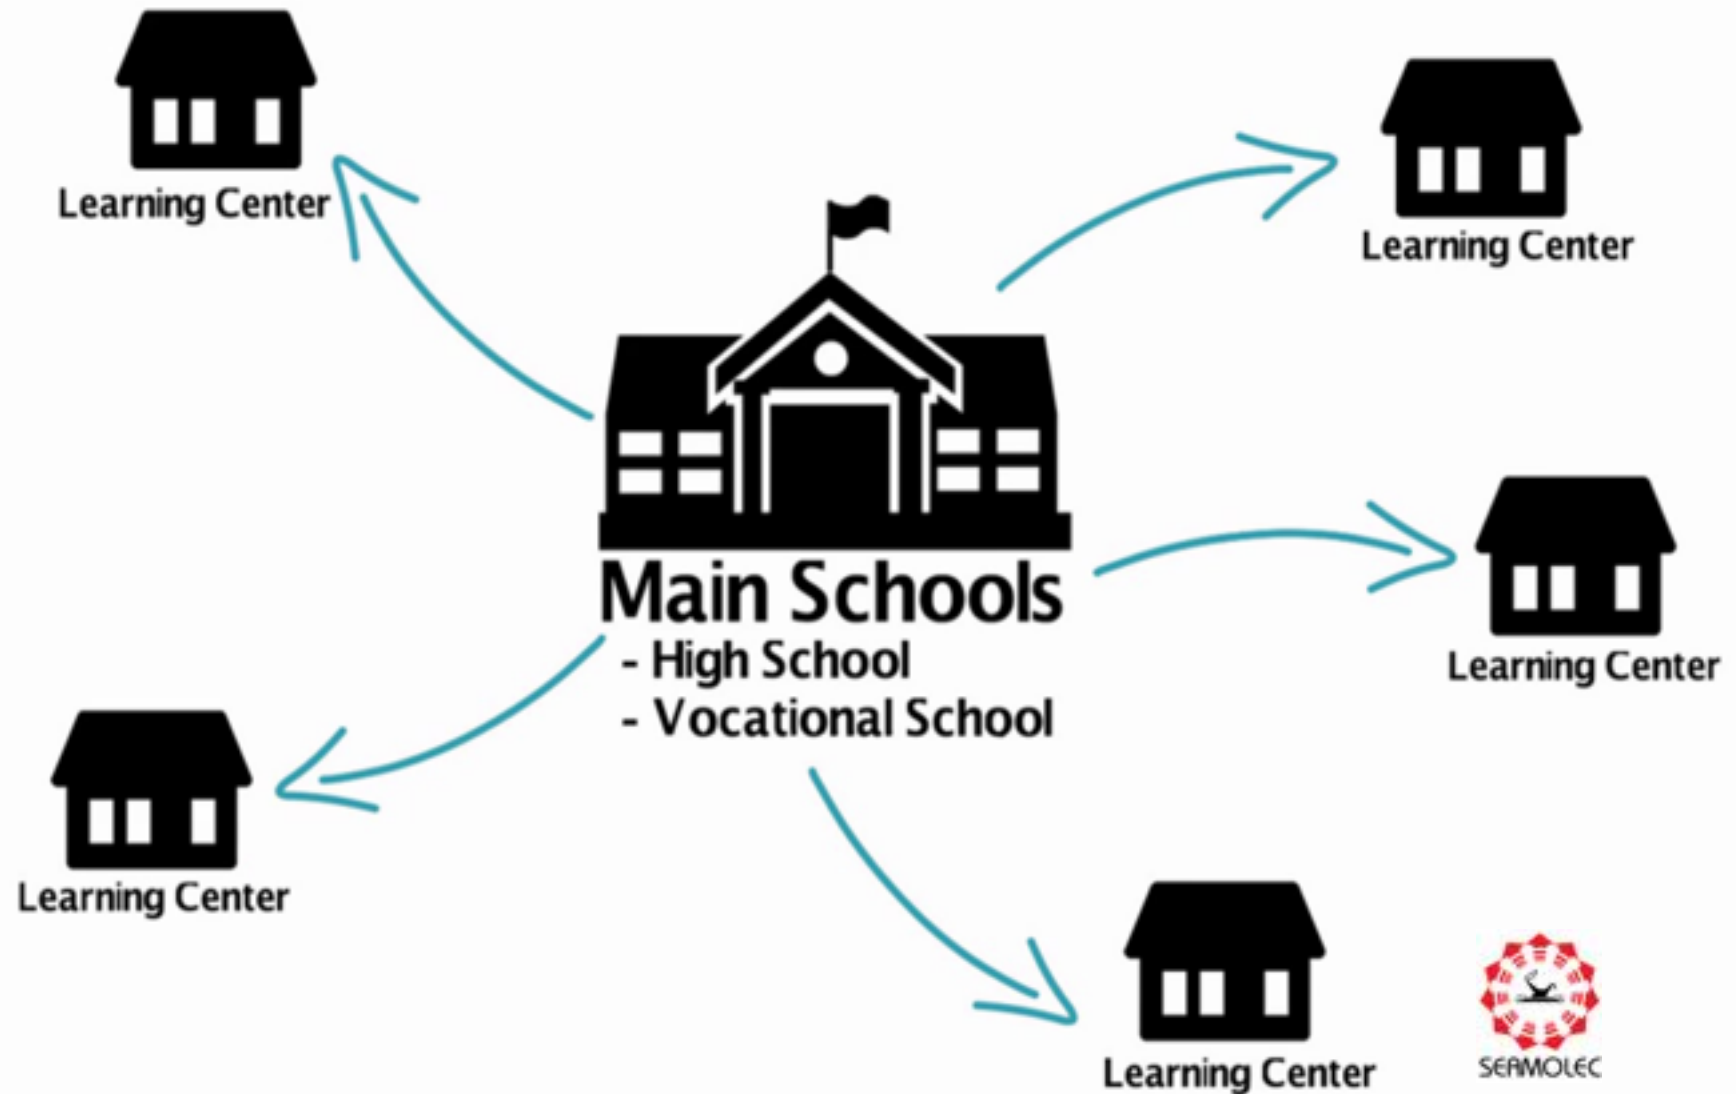

# Cost comparison between conventional computer lab vs SIERRA Device

|                                  | Computer Lab                             | Sierra                   |
|----------------------------------|--|--------------------------|
| <b>Main devices</b>              | 40 personal computer                     | 40 Smartphone/ tablet    |
| <b>cost</b>                      | @ 500 USD x40                            | @100 USD x40             |
| <b>Setup</b>                     | Networking Cable configuration and setup | Staging and Installation |
| <b>cost</b>                      | 500 USD                                  | 100 USD                  |
| <b>Other component</b>           | Switch 2 pcs + electricity 1 month       | Power Bank 10,000 mAh    |
| <b>cost</b>                      | 400 USD + 200 USD                        | @ 10 USD x 40            |
| <b>Accessing Digital Content</b> | Internet Connection                      | -                        |
| <b>cost</b>                      | 1,000 USD / year                         | -                        |
| <b>Total Cost</b>                | <b>22, 100 USD</b>                       | <b>4,500 USD</b>         |

# Learning Centres

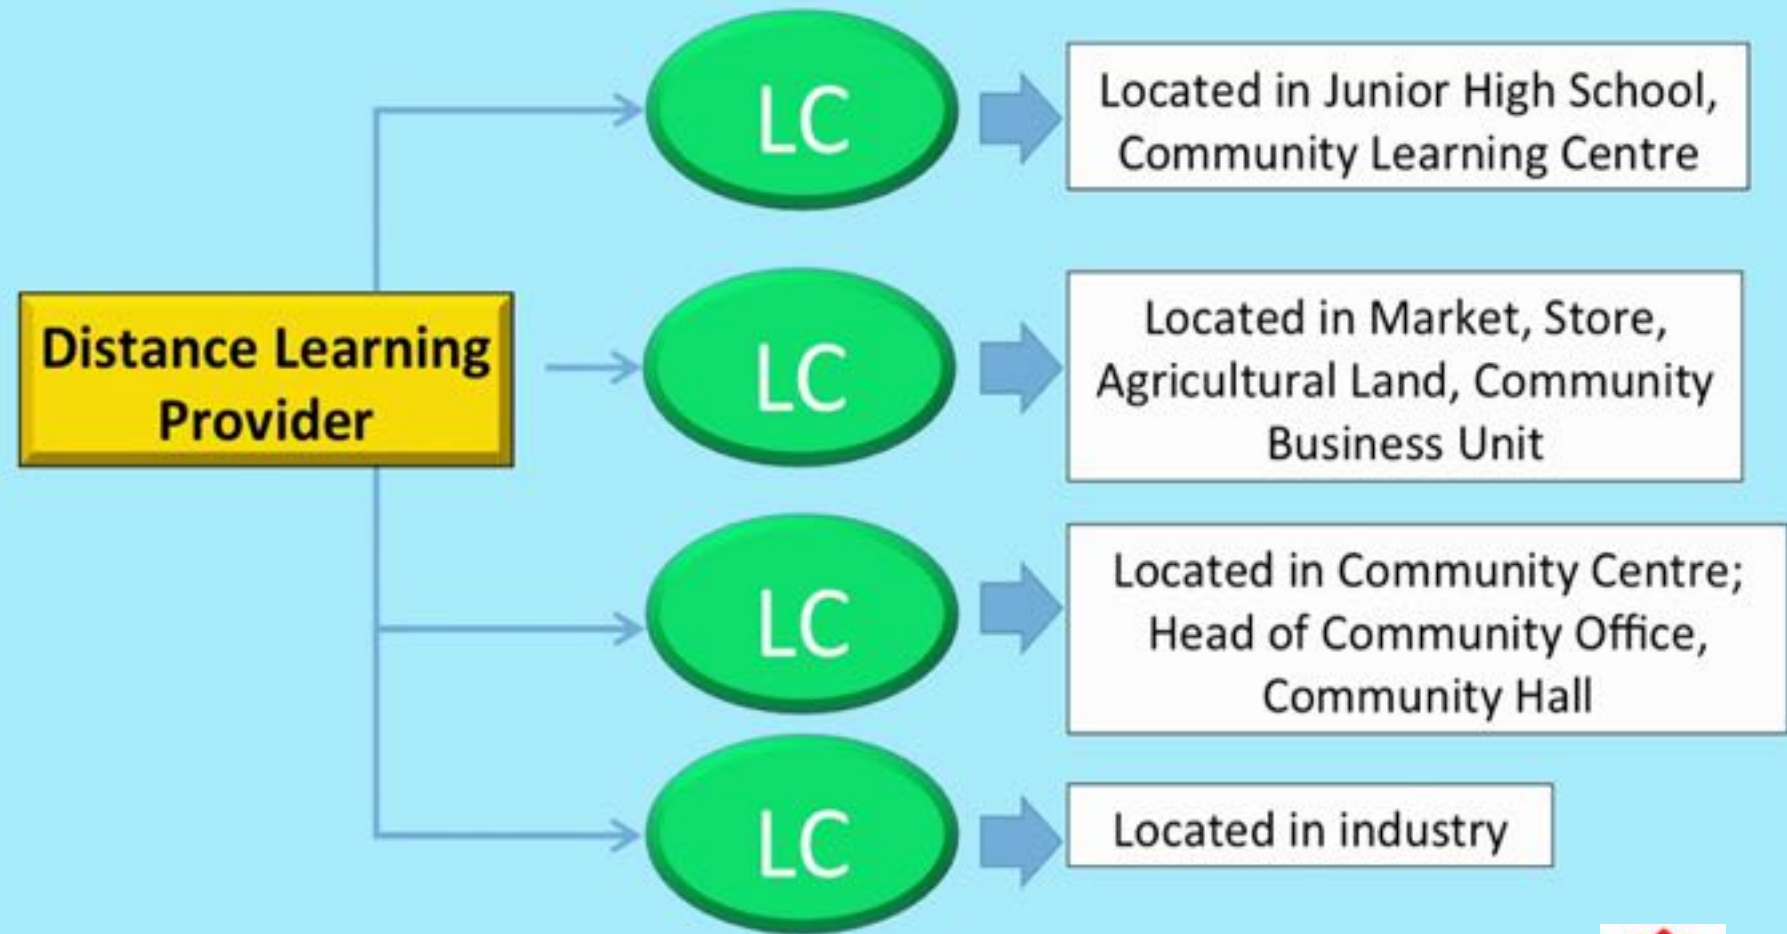

# Open High School and Learning Activity Units

- SMAN 2 Padalarang as a Main School
- TKB (Learning activity unit- tempat kegiatan belajar)1 located on Situwangi Kecamatan Cihampelas
- Distance between Main Schools to TKB is 17 km.

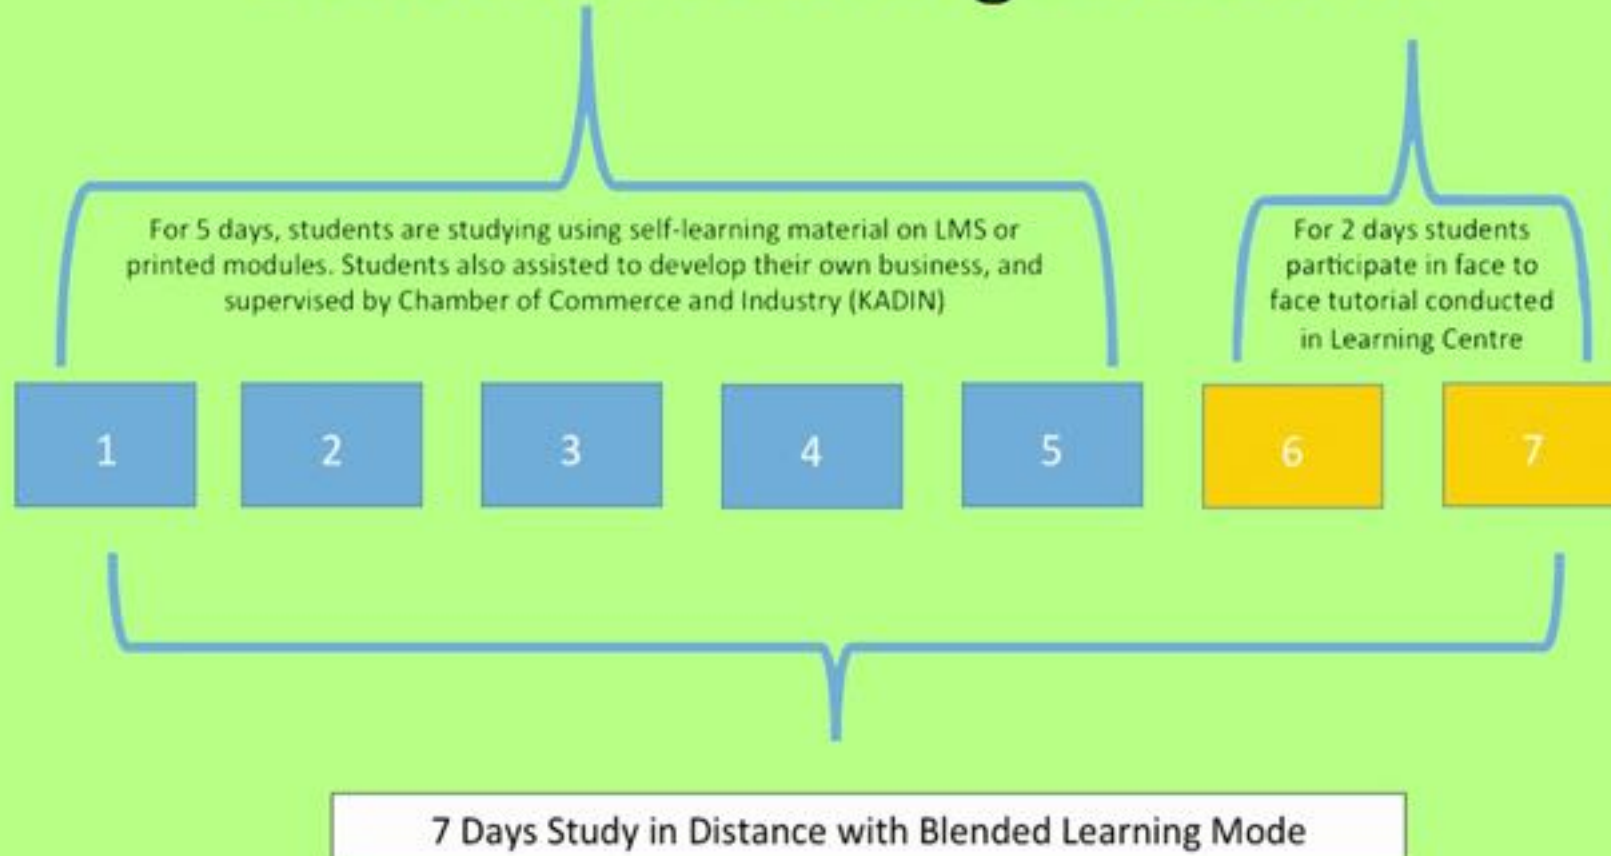

# Learning Centres

# Flexible learning process

## Example of Learning Schedule For Distance Learning Students

# Hybrid-mode of ICT-based ODL

- Delivers its learning materials via three types of blended mode:
  1. face-to-face based
  2. video conference based
  3. web-based
- ICT based is ranging from 30-79%
- Face-to-face delivery is 30%
- Allows students to study while not leaving their work
- Communication between students and tutors is carried through emails, mobile communication application
- Uses web-based learning resources

# Learning Management System (LMS)

Called:

SIAJAR (Sistem Informasi Pembelajaran Jarak Jauh/ Distance Learning Information System)

[Access: http://jass.disdik.jabarprov.go.id](http://jass.disdik.jabarprov.go.id)

Available features:

1. To create and manage courses
2. To evaluate students' learning
3. To serve as communication forum
4. To track student attendance and performance

# SIAJAR

SIAJAR LMS | Sekolah Terbuka

lms.seamolec.org/siajar-lms.php

MASUK DAFTAR

## Selamat datang di SIAJAR

Secara tersistem SIAJAR terhubung sekaligus terintegrasi dengan **Sumber Belajar** sehingga guru dapat mengelola pembelajaran dengan aman dan cepat. SIAJAR dirancang untuk memberikan kemudahan tampilan sekaligus kontrol dalam pelaksanaan kelas digital untuk SMA.

Sebagai *Learning Management System* (LMS), SIAJAR menyediakan kelengkapan pembelajaran dari perancangan, pelaksanaan pembelajaran, sampai ke penilaian. Karena Penilaian Akhir seperti PTS (Penilaian Tengah Semester), PAS (Penilaian Akhir Semester), dan PAT (Penilaian Akhir Tahun) dilaksanakan di sekolah, maka SIAJAR hanya menyediakan materi pembelajaran dan soal yang dikembangkan oleh guru sebagai wahana berlatih menghadapi Penilaian Akhir tahun dan Ujian Nasional yang sesungguhnya.

**Mudah**

Dengan fitur-fitur intuitif dan penyimpanan yang tidak terbatas dengan Gudang Media, dengan cepat membuat grup, memberikan pekerjaan rumah, menjadwalkan kuis, mengelola kemajuan dan banyak lagi. Dengan segala sesuatu pada satu pla

**Aman**

Siajar dirancang untuk memberikan kontrol penuh atas kelas digital Anda. Dengan alat yang memungkinkan Anda menentukan siapa yang dapat gabung dengan grup, memantau aktivitas anggota.

**Serba Guna**

Apakah Anda ingin menciptakan ruang kelas tanpa kertas, membina keterampilan kewarganegaraan digital, mengintegrasikan konten pendidikan dari Gudang Media, atau tumbuh jaringan pembelajaran profesional Anda, Anda dapat mempersonal ...

SEAMOLEC

From population aged  
between 16 – 18 years old:  
2016 = 2.516.800  
2017 = 2.500.300  
2018 = 2.482.200

From this numbers there'  
are dropped out students  
or not continuing for  
education, in amount of:  
2016 = 787.664  
2017 = 691.218  
2018 = 468.874

# OUTCOME OF GROSS ENROLLMENT RATE

--- Period of the Implementation of of ODL ---

## LMS Users

# 1.700

learning object material

Until now the LMS has been facilitating:

- more than 7,000 accounts for teachers, tutors, and class administrators
- more than 17,000 students' accounts
- more than 1700 learning object material as student learning modules

# Room for improvements

- Need more socialization about this programme to society by involving more stakeholders or local public figure
- Needs sociological and anthropological perspectives to ensure decent and appropriate implementation of ODL
- Need more support from business/industrial sectors to open opportunities for students to do trainings/internships
- Local MOE Offices need to maximize recruitment process from the targeted possible students
- Opening vocational study programmes should match with local content/potential and the need of local, national or regional industry
- Need more infrastructure facilities to support the learning process, i.e: internet connection
- Need more trainings for teachers to update them with ICT literacy

# Opportunities

Programme replication to be implemented in:

1. other provinces of Indonesia, and
2. Southeast Asian countries and beyond

*Reaching The Unreachable Making The  
World into One World of Learning*
